PROFESSIONAL SUMMARY

B.Tech graduate in Electronics & Computer Engineering (2026) with proven experience in data analysis, SQL-based reporting, and Business Intelligence dashboards using Power BI. Completed a Data Analyst internship at Honda Cars India Ltd, where I automated reporting workflows and delivered actionable insights from 100+ trainee datasets. Also completed a 6-month Python Full Stack industrial training internship at Kiran Academy as a Trainee Developer. Proficient in Python, SQL, Power BI, Pandas, Flask, and REST APIs. Seeking a Data Analyst or Software Developer role to build scalable, data-driven solutions.

TECHNICAL SKILLS

Programming languages: Python, Java, JavaScript, C, C++

Web development: HTML, CSS, Flask, Django, REST APIs

Databases: MySQL, PostgreSQL

Business Intelligence & reporting: Power BI, Excel (Advanced), Dashboard Reporting

Data analysis & ML: Pandas, NumPy, scikit-learn, ETL, Data Visualisation, Machine Learning

Cloud & version control: Git, GitHub, AWS (basics), VS Code

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

WORK EXPERIENCE

Trainee Developer (Python Full Stack Industrial Training Internship)

Jan 2026 – Jun 2026

Kiran Academy (Pune, Maharashtra)

- Completed a 6-month industrial training internship, working as a Trainee Developer on a full-stack Python project under the guidance of the academy's technical team.
- Applied Python, Flask, SQL, and front-end fundamentals (HTML, CSS, JavaScript, React.js) to build and iterate on the assigned industrial project.
- Gained hands-on experience with data analysis and machine learning libraries including NumPy, Pandas, Matplotlib, and scikit-learn for data manipulation, visualization, and predictive modeling.
- Practiced end-to-end development workflows spanning data analysis, REST APIs, and full-stack integration, reinforcing concepts used in later academic projects.
- Collaborated with mentors and peers to structure project requirements, debug issues, and iterate on features throughout the development cycle.
- Strengthened understanding of full-stack architecture by integrating front-end interfaces with backend Flask APIs and SQL-based data storage.

Data Analyst Intern

Oct 2025 – Jan 2026

Honda Cars India Ltd (Tapukara, Rajasthan)

- Analysed training and assessment data for 100+ employees using Advanced Excel and Google Sheets, identifying performance trends and learning gaps to support monthly review decisions.
- Performed data cleaning on monthly datasets in Excel — handling missing values, duplicates, and inconsistencies — to prepare structured, analysis-ready reports.
- Conducted statistical analysis on training records to uncover patterns and support data-driven review decisions.
- Built Power BI dashboards and automated Excel reporting templates, reducing manual reporting effort by ~30% and replacing ad-hoc spreadsheet reports for the Training & Manpower Development team.
- Prepared PowerPoint presentations and Word reports summarising monthly training insights for HR and management review.

- Collaborated with HR and training teams to standardise data collection workflows, improving reporting turnaround and ensuring consistency across monthly training records.

PROJECTS

IPL Data Analysis Web App - Team Leader | github.com/Riteshsharma28/ipl-data-analysis

- Built a Flask and Python web application performing ETL on raw IPL CSV data, delivering structured insights including player statistics, season trends, and match outcome predictions. Processed and cleaned 10+ seasons of IPL match data using Pandas; visualized results through interactive dashboards.
- Tech stack: Python, Flask, Pandas, scikit-learn, HTML/CSS.

JourneyGram - Team Leader | github.com/Riteshsharma28/journeygram

- Designed and built a tourism-focused web platform selected for the Regional Round of DIPEX 2025, presented over a 3-day exhibition in Pune to an industry jury.

Smart City Data Analytics - Team Leader | github.com/Riteshsharma28/smart-city

- Built a Flask-based web application to analyse and visualize smart city data, presenting insights through interactive charts and dashboards for metrics such as traffic, utilities, and civic infrastructure.
- Tech stack: Python, Flask, Pandas, Matplotlib, HTML/CSS.

EDUCATION

B.Tech in Electronics & Computer Engineering

2022 – 2026

CSMSS Chh. Shahu College of Engineering, Chhatrapati Sambhaji Nagar | CGPA: 8.8/10

CERTIFICATIONS & ACHIEVEMENTS

NPTEL Certifications

- Problem Solving through C (2023)
- Programming in Java (2024)
- The Joy of Computing using Python (2024)

DIPEX 2025

- Selected for the Regional Round of DIPEX 2025 and presented the “JourneyGram” project over a 3-day exhibition in Pune.

Academic Excellence

- Awarded 2× Class Topper recognition with academic excellence medals.
